Programmers Placing Programmers

React Native vs. Expo

React Native (*RN)

React Native (RN)

React Native

- Mac - Install XCode

TONKA SOURCE
Programmers Placing Programmers

React Native (RN)

- Mac - Install XCode
- Windows - Java SDK 8.1, PHP 2.7, Android Dev Studio, Emulators

React Native (RN)

- Mac - Install XCode
- Windows - Java SDK 8.1, PHP 2.7, Android Dev Studio, Emulators
- Deploys to Google Play | Apple Store

React Native (RN)

React Native

- Mac - Install XCode
- Windows - Java SDK 8.1, PHP 2.7, Android Dev Studio, Emulators
- Deploys to Google Play | Apple Store
- Can use 'Native Modules' (eg. objective-c libraries)

React Native (RN)

React Native

- Mac - Install XCode
- Windows - Java SDK 8.1, PHP 2.7, Android Dev Studio, Emulators
- Deploys to Google Play | Apple Store
- Can use 'Native Modules' (eg. objective-c libraries)
- Command: **react-native init** MyAwesomeApp

React Native vs. Expo (RN vs. CRNA)

React Native vs. Expo
(RN vs. CRNA / Expo)

React Native

Expo

CRNA: create-react-native-app HelloWorld

TONKA SOURCE
Programmers Placing Programmers

React Native vs. Expo
(RN vs. CRNA / Expo)

React Native

∧ Expo

CRNA: create-react-native-app HelloWorld
   - A React Native "Expo App"

ts TONKA SOURCE
Programmers Placing Programmers

React Native vs. Expo
(RN vs. CRNA / Expo)

RN: react-native init HelloWorld

vs.

CRNA: create-react-native-app HelloWorld
- A React Native "Expo App"

React Native vs. Expo
(RN vs. CRNA / Expo)

RN: react-native init HelloWorld
   - A react native "Native" app
vs.

CRNA: create-react-native-app HelloWorld
   - A React Native "Expo App"

TONKA SOURCE
Programmers Placing Programmers

React Native vs. Expo
(RN vs. CRNA / Expo)

RN: react-native init HelloWorld
 - A react native "Native" app – *STILL JAVASCRIPT!*
vs.

CRNA: create-react-native-app HelloWorld
 - A React Native "Expo App"

CRNA / Expo App

∧ Expo

- Don't need Xcode or Android Studio

CRNA / Expo App

- Don't need Xcode or Android Studio
- Very easy to test on multiple devices

CRNA / Expo App

∧ Expo

- Don't need Xcode or Android Studio
- Very easy to test on multiple devices
- Easy to deploy to testers on the same network

CRNA / Expo App

Λ Expo

- Don't need Xcode or Android Studio
- Very easy to test on multiple devices
- Easy to deploy to testers on the same network
- Can deploy to Expo's 'Store'

CRNA / Expo App

^ Expo

- Don't need Xcode or Android Studio
- Very easy to test on multiple devices
- Easy to deploy to testers on the same network
- Can deploy to Expo's 'Store'
  - Glorified 'Web App'

CRNA / Expo App

∧ Expo

- Don't need Xcode or Android Studio
- Very easy to test on multiple devices
- Easy to deploy to testers on the same network
- Can deploy to Expo's 'Store'
    - Glorified 'Web App'
- Lots of 3rd party components
